Hi Caitlin,

If there are only a small number of substantive comments, then that amount should be fine.

Best,

Jen

Hi Jen,

Jennifer Neely asked if we could provide an estimate of the amount to add, as we're working on the budget. Perhaps I can ask her to add $2500 -- do you think that would be enough to cover comment responses and the admin record?

Hi Caitlin,

I don't know yet how much we might need to add; it will depend on what happens with public comments. Can we wait to make a decision?

Thanks, Jen.

Do you have a sense of how much we should add to the task order? If we add the amount we have left on the task order currently, will that be enough to respond to comments and put together the admin record?

Thanks,

Caitlin

Hi Susan,

This won't be too bad, but some of the cost estimates will change. We use different unit administrative costs for consultations depending on whether they occur in occupied or unoccupied habitat, so we'll have to make a switch in those two units.

I'm out of the office this week, but I should be able to get you the revise memo next week, when I return.

Also, Caitlin, you should make Jennifer Neely aware that we'll be using the funding we had set aside to address public comments to make this change. So, if there are substantive public comments that require our help, we may need a mod to add funding to the task order.

Thanks,

Jen

Hi Jane and Jennifer-

We need a change to the economic screening memo for Texas hornshell. Up to this point, we have been calling units 1b (Delaware River subunit) and 2 (Pecos River unit) unoccupied because they do not contain reproducing populations of hornshell. We have decided to change that and just call them occupied because of the presence of individuals.

I don't think this changes your analysis, since for section 7 purposes we would have consulted because of the presence of the species and you analyzed them that way, but there are tables and text that need to be amended.

I hope this isn't too big of a change. I appreciate the help.

Susan
